† Extending from Fremantle to Midland Junction, both inclusive. † Decrease.

No. 40.—Average Weekly House Rents, Sept. Quarter, 1930, and Dec. Quarter, 1930.

Period.	Index No.	Percentage Increase as compared with July, 1914.	Quarter ended September, 1930.		Quarter ended December, 1930.	
1914.			Cottages.		Metropolitan Area.	
July ...	1340	...			(a)	(a)
3rd Qr. (July to September)	1698	26.72				
October ...	1576	17.61	Wood—		s. d.	s. d.
November ...	1532	14.33	4 rooms ...		16 6	16 3
December ...	1514	12.99	5 rooms ...		20 10	21 9
4th Qr. (October to December)	1541	26.72	Brick—			
			4 rooms ...		20 10	19 9
			5 rooms ...		28 1	25 7

* Representing variations in the cost of food and groceries in the Metropolitan Area for the periods referred to, with weighted average for six capital towns in 1911 as base = 1000.

(a.) See Note to Table No. 39. For the Quarter ended December, 1930, the average weekly house rent for four and five roomed houses for the Metropolitan Area was 21½ as compared with 22½ for the Quarter ended Sept., 1930. In calculating the average rent for each quarter, "weights" representing the number of houses in the Metropolitan Area as disclosed by the 1921 Census were used.

XIV.—WAGES.

No. 41.—Minimum Rates of Wages established under Awards of Courts of Arbitration and Industrial Agreements, in certain Trades and Occupations up to 31st December, 1930.

Note.—The rates relate to the Metropolitan Area except where otherwise stated.

XV.—METEOROLOGICAL STATISTICS.

(Supplied by Commonwealth Meteorologist)

No. 42.—Notes on the Rainfall of Western Australia during the months of October, November, December, and Year 1930.

October.—Like the previous month, October was marked by weak rainfall over the greater part of the Agricultural country. The conspicuous exception was the Midland country, where, thanks to very useful rains on the 9th, the averages were somewhat exceeded. General agricultural showers occurred on the 5th and 14th, but were decidedly lighter than might have been wished for, and totals through the Eastern, Central and Southern wheat areas were from 30 to 60 per cent. below normal, and the earlier harvest estimates were, consequently, somewhat reduced.

Much more satisfactory results were obtained from the Coolgardie Goldfields, where one of the best falls for the past 18 months was experienced on the 22nd, and averages were, in consequence, greatly exceeded. The same disturbance brought patchy falls, which, here and there, showed excesses above normal, to the inland North-West and Gascoyne, and the latter half of the month also saw an early onset of rains in the East and inland Kimberleys, where excesses were also met with.

November.—Although monsoons were a prominent feature of the month's weather charts, they brought no extensive or heavy rains, their activity being chiefly reflected in the form of short-lived heat spells. These were almost invariably terminated by the passage of sharply defined southern "lows" across the Southern regions of the State. Rainfall on the South-West coast was, in consequence, somewhat above the average, but, although thunder showers were of frequent occurrence in the agricultural country and on the Coolgardie Goldfields, the aggregate falls everywhere fell short of the monthly normal. The period was rainless in the North-West, and almost so over the Gascoyne and Murchison, but at intervals during the month patchy rains visited the Kimberleys—more particularly the inland portions, where the averages were considerably exceeded. In view of the poor results obtained over those areas during recent years, however, much heavier falls were needed to put the country in good heart.

December.—The two outstanding events of the month were the thunderstorms which occurred about the middle of the month through the Agricultural areas and Pastoral districts and the heavy rains in the Kimberleys and the North-West between December 24th and 31st.

Over the Goldfields some very heavy falls were registered, ranging up to over 6in. at Kanowna, where the country was flooded. Unfortunately, through the agricultural country these thunderstorms were accompanied by hail and strong winds, and in many instances considerable damage was done.

In the Kimberley and North-West the usual scattered thunderstorms occurred during the early part of the month, and, following upon a prolonged dry spell, these were much appreciated. General relief, however, was not effected until the 24th, when a disturbance of willy-willy type developed off the North Kimberley coast. Its subsequent movements brought it over the West Kimberley country, inland over Marble Bar, and Southwards as far as Leonora on the Northern Goldfields. These rains ranked amongst the best for some years, and, following upon a similar fall in February, 1930, must result in putting the country in good heart for some time to come.

In the Metropolitan area the hail-storms above mentioned caused some damage in the market-gardening districts. Perth experienced its hottest spell for the season with the advent of the Christmas holidays, 101 deg. being registered on the 26th. Only in 1915, when 101.9 deg. was registered, was this temperature ever exceeded on Boxing Day.

Year : Kimberley and North-West.—As a rule January is regarded as a good rainfall month in the Kimberley, and sometimes during that month valuable falls are experienced in the North-West. January of 1930 was, however, an exception in almost every respect, and, taken as a whole, ranks as one of the driest on record. A disturbance of the willy-willy type, in February, completely altered the position in the Kimberley and the rain results were most gratifying. Although somewhat less than average rainfalls were recorded at some of the inland centres, Derby, on the other hand, exceeded the normal fall by over eight inches and Wyndham by over seven inches. The rains extended down the North-West coast as far as the De Grey station, and then swept through the inland North-West. The March rains were very weak in the East Kimberley, but in the West the registrations, although still below the average, were much heavier, while the development of a Cocos Island disturbance brought heavy rains to the Coastal areas of the North-West and useful rains to the inland portion of that division. This was practically the last of the Kimberley rain, until the end of the year, when thunderstorms recommenced, giving some occasional falls during December, and the year closed with a storm of willy-willy type, which brought heavy downpours to the Kimberley and inland North-West, and subsequently traversed the unoccupied Eastern regions of the State, affecting, however, the extreme North-Eastern fringe of the Goldfields and the Trans-Australian country.

Gascoyne and Goldfields.—No rains worth mentioning were experienced in these divisions during January, but the February willy-willy referred to previously, after leaving the North-West, moved through the extreme Eastern edge of our pastoral country and finally reached our South Coast. Its course lay too far East to affect the settled regions, where, apart from a few outlying Goldfields localities, the month's rainfall was meagre. Heavy floods, however, dislocated traffic on the East-West Railway. The following three months saw rain on various occasions through both divisions, but there were no good general falls. June was marked by a general rainfall extending from Onslow to Esperance and inland to the South Murchison and Coolgardie Goldfields. Excellent rains were also noted in July, August and October, while the position was still further improved in December. On the Coolgardie Goldfields some heavy falls occurred during this month, the heaviest being 594 points at Kanowna, registered during three days. At the close of the year the North-Eastern fringe of the Goldfields, and the trans-Australian country, were affected by the North-West storm above mentioned, the railway again being subjected to extensive flooding.

Agricultural Districts.—In the Agricultural country a dry and exceedingly hot Summer was experienced, but good rains in Autumn and early Winter gave the crops a splendid start. Early in July, as a result of the heavy rains, and of persistent Westerly gales, the Swan river was flooded to the 1917 level. The rains, however, dwindled towards the interior, and were rather weak in the outer areas. This, however, was remedied by inland monsoonal falls in August. The Spring months were somewhat anxious, but in general the falls proved adequate. The season finally closed on October 18th, and practically the only other rains before the end of the year occurred in the form of thunderstorms in December. These, unfortunately, were in many instances accompanied by hail, a large amount of damage being caused. The Crops were stripping exceptionally well and farmers in the majority of districts anticipated record yields.
